

Labour Force Statistics ♦ November 2009

(All labour force statistics are seasonally adjusted, unless otherwise indicated)

Unemployment rate stable at 8.3%

British Columbia's jobless rate remained unchanged in November, at 8.3%. Marginal gains in employment (+9,900) were offset by a small increase in the number of people working or looking for work (+0.5%). Although B.C.'s unemployment rate remains below the national average, it is higher than the jobless rates in Saskatchewan (5.2%), Manitoba (5.3%), Alberta (7.4%), and Quebec (8.1%).

B.C.'s jobless rate higher than Alberta's, but remains slightly below national average

BC Stats

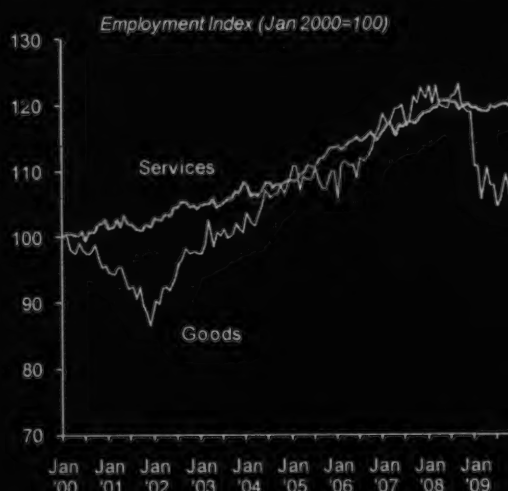

All of November's job gains were due to an increase in part-time employment (+21,600), while full-time employment decreased slightly (-11,700).

Job gains concentrated in service sector

Job gains in the province's service sector (+1.3%) were offset somewhat by losses in the goods sector (-2.9%). Compared to November 2008,

employment in the services sector is up 1.2%, while employment in the goods sector is down 12.5%.

Service sector employment climbs in November

BC Stats

In the goods-producing sector, most industries experienced employment declines, although utilities saw modest job gains (+2.9%). Employment declined in both construction (-1.8%) and manufacturing (-3.7%), which are the largest employers in the goods sector.

Within the services-producing sector, the most notable job gains were in other services (+8.5%), educational services (+5.0%), information, culture & recreation (+4.7%), and professional, scientific & technical services (+4.3%). These gains were partially offset by job losses in transportation & warehousing (-2.2%) and trade (-1.9%).

Labour Force Statistics ♦ November 2009

(All labour force statistics are seasonally adjusted, unless otherwise indicated)

Unemployment rate stable at 8.3%

British Columbia's jobless rate remained unchanged in November, at 8.3%. Marginal gains in employment (+9,900) were offset by a small increase in the number of people working or looking for work (+0.5%). Although B.C.'s unemployment rate remains below the national average, it is higher than the jobless rates in Saskatchewan (5.2%), Manitoba (5.3%), Alberta (7.4%), and Quebec (8.1%).

B.C.'s jobless rate higher than Alberta's, but remains slightly below national average

BC Stats

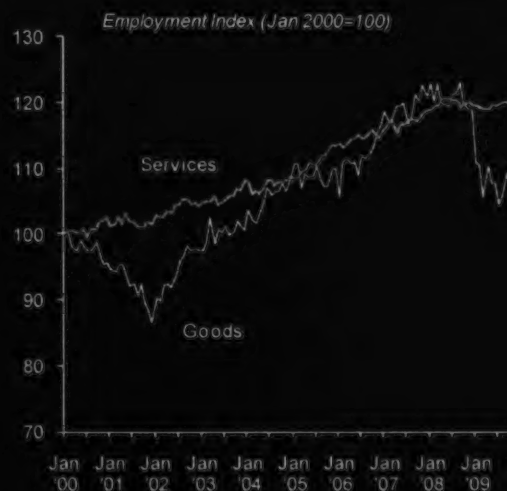

All of November's job gains were due to an increase in part-time employment (+21,600), while full-time employment decreased slightly (-11,700).

Job gains concentrated in service sector

Job gains in the province's service sector (+1.3%) were offset somewhat by losses in the goods sector (-2.9%). Compared to November 2008,

employment in the services sector is up 1.2%, while employment in the goods sector is down 12.5%.

Service sector employment climbs in November

BC Stats

In the goods-producing sector, most industries experienced employment declines, although utilities saw modest job gains (+2.9%). Employment declined in both construction (-1.8%) and manufacturing (-3.7%), which are the largest employers in the goods sector.

Within the services-producing sector, the most notable job gains were in other services (+8.5%), educational services (+5.0%), information, culture & recreation (+4.7%), and professional, scientific & technical services (+4.3%). These gains were partially offset by job losses in transportation & warehousing (-2.2%) and trade (-1.9%).

Job gains evenly distributed

November's job gains were distributed relatively evenly among men (aged 25+), women (aged 25+), and youth (aged 15-24). Despite job gains, labour force growth caused the jobless rates of B.C. men (7.6%) and youth (16.0%) to increase slightly.

Aboriginal Population

The economic downturn has affected Aboriginal adults in B.C. differently than their non-Aboriginal counterparts. Compared to this time last year, the province's Aboriginal labour force (aged 25+) has shrunk by 7.5% (3-month moving average, unadjusted), and employment has declined by 8.2%. For comparison, among the non-Aboriginal population (aged 25+), the labour force has grown by 2.4%, and employment is down only 0.1% compared to the same time last year.

Immigrant Population

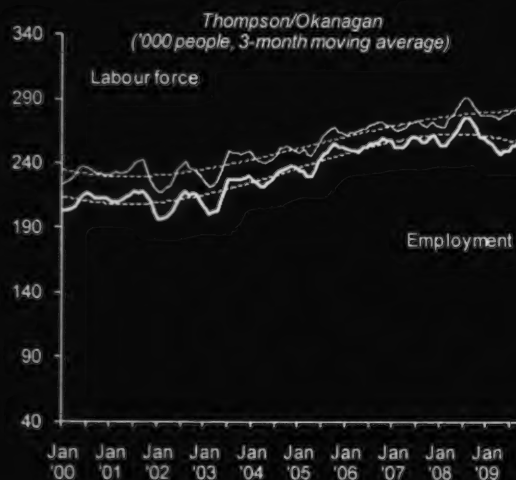

Although the jobless rate among B.C.'s landed immigrant population (aged 25-54) was higher than their Canadian-born counterparts in November (7.5% vs. 6.0%) (3-month moving average, unadjusted), this gap is not as pronounced as in other parts of the country. At the national level, the unemployment rate of landed immigrants aged 25-54 was 3.5 percentage points higher than their Canadian-born counterparts.

The Regions

In the province's development regions, unemployment rates (3-month moving average, unadjusted) ranged from a low of 5.8% in Northeast to a high of 12.0% in Cariboo. Compared to the same time last year, employment has declined in all but one region of the province: Thompson/Okanagan (+3.3%). However, labour

force growth in Thompson/Okanagan (+3.9%) has outpaced employment growth, and consequently, the unemployment rate in this region (6.3%) is still higher than it was one year ago (5.8%).

Recent job gains in Thompson/Okanagan outweighed by labour force expansion

BC Stats

The Nation

Canada's unemployment rate edged down 0.1 percentage points to 8.5% in November. This decrease was the result of job gains (+0.5%) that slightly outpaced labour force expansion (+0.4%).

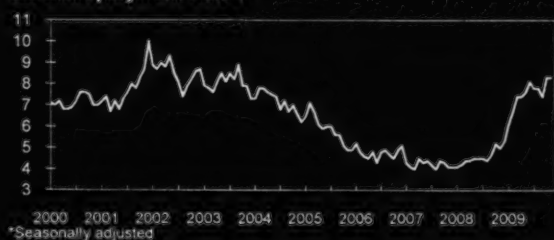

Provincially, the most notable employment gains were in Quebec (+0.6%) and Ontario (+0.4%). In Ontario, these gains were offset by growth in the labour force (+0.4%), leaving the unemployment rate unchanged. In Quebec, however, the unemployment rate fell 0.4 percentage points to 8.1%.

NOTES: 1. Occupation specific Unemployment Rates include only those unemployed who worked in the past year. The "All Occupations" rate incorporates total unemployed persons which includes an "Occupation Unclassified" category.

2. Due to the relatively small sample sizes from which disaggregated data are derived, caution should be used in the interpretation of month-to-month changes in the estimates.

Labour Force Statistics

This report is based on statistics from the Labour Force Survey produced monthly by Statistics Canada. Questions and comments should be directed to Data Services at (250)387-0327 or write to BC.Stats@gov.bc.ca

Definitions and Explanatory Notes

Reference Week

Monthly estimates of employment, unemployment, and persons not in the labour force refer to the specific week covered by the survey each month, normally the week containing the 15th day.

Labour Force

The labour force is composed of those members of the civilian non-institutional population 15 years of age and over who, during the reference week, were employed or unemployed.

Employed

Employed persons are those who, during the reference week, either: (a) did any work at all, or (b) had a job but were not at work due to own illness or disability, personal or family responsibilities, bad weather, labour dispute, vacation, or other reason not specified above (excluding persons whose job attachment was to a job to start at a definite date in the future).

Unemployment

Unemployed persons are those who, during the reference week, either: (a) were without work, had actively looked for work in the past four weeks (ending with the reference week), and were available for work; or (b) had not actively looked for work in the past four weeks but had been on layoff and were available for work; or (c) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from the reference week, and were available for work.

Unemployment Rate

The unemployment rate represents the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number of unemployed in that group expressed as a percentage of the labour force for that group.

Participation Rate

The participation rate represents the labour force expressed as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex, marital status, etc.) is the labour force for that group expressed as a percentage of the population for that group.

Employment Rate

The employment rate (employment/population ratio) is the number of employed persons expressed as a percentage of the population 15 years of age and over. The employment rate for a particular group (age, sex, marital status, etc.) is the employment for that group expressed as a percentage of the population for that group.

Rounding

Estimates published by the Labour Force Survey are rounded to the nearest thousand but all derived values (totals, averages, rates, ratios, percent changes etc.) are calculated from unrounded figures. Therefore, the sum of the individual rounded items may not equal the total. Unadjusted estimates rounded to hundreds are available from BC Stats on request.

Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods, and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.
